JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

asked for or while exemption claims are pending. It leads to endless confusion.

Don't try to deprive another chemist actually in the Army of his opportunity to render chemical service by yourself seeking such service, *until called*. The industries which supply the Army and Navy with the sinews of war need trained chemists and are being seriously handicapped by the depletion of their chemical personnel.

Don't write to anyone in Washington to aid you in a claim for exemption. Even if they wished to do so, they are quite properly powerless for the law delegates exemption to the Local and District Boards.

Do send me your name, address, military and camp assignment when actually sworn in (not before). If you have not already filed details of your age, training and experience, send this also at the same time.

CHARLES L. PARSONS,  
*Secretary*

AMERICAN CHEMICAL SOCIETY,  
Box 505,  
WASHINGTON, D. C.

#### THE MAYO FOUNDATION

At the meeting of the board of regents of the University of Minnesota held on September 13, the regents adopted the following resolution thanking the Drs. Mayo for their gift establishing the Mayo Foundation for medical investigation and research:

*Whereas*, Dr. William J. Mayo and Dr. Chas. H. Mayo, of Rochester, Minnesota, have given the sum of \$1,650,344.79 to the University of Minnesota for the establishment of a fund to be known as the "Mayo Foundation for Medical Education and Research," and,

*Whereas*, This gift has been duly accepted by unanimous action of the board of regents,

*Therefore, be it Resolved*, That the board of regents records its profound sense of gratitude to the donors. The gift is unique in the annals of American education. It represents the lofty purposes of two of the most distinguished citizens of our commonwealth. They believe that this money has come from the people and that it should be returned to the people. It has been the sole aim of the donors to provide a fund which would be of permanent benefit to the state of Minnesota and to mankind as a whole. They have wisely and appropri-

ately provided that the income of the fund shall be used for medical education and research. American universities should be encouraged in the prosecution of an educational policy which aims to develop investigators and scientists of the first rank. One clear function of a true university is to make actual contributions to various fields of knowledge. This new foundation, therefore, relates itself very intimately to the realization of our highest educational aims. Both for the gift itself and for the genuine impetus which it will impart to scholarly investigation in this university, we desire to convey to the donors our sincere appreciation.

#### THE CONNAUGHT LABORATORIES OF THE UNIVERSITY OF TORONTO

The Connaught Laboratories of the University of Toronto, and a farm of fifty acres, were formally presented by Colonel Albert Gooderham, to the University of Toronto and at the same time officially opened by the Governor General, the Duke of Devonshire, on October 25. The value of the gift is about seventy-five thousand dollars. The laboratories are to be used for the purpose of research in preventive medicine and for the production of serums and vaccines. Sir William Hearst, the premier of Ontario, at the opening, announced that a grant of seventy-five thousand dollars would be authorized at the next session of the legislature, to establish a research foundation in preventive medicine. The income from this and also from an additional twenty-five thousand dollars, will be used for research only, the laboratories being self-supporting. This is the first endowment of research in preventive medicine in Canada. In connection with the official opening of these laboratories, a lecture was delivered in Convocation Hall, on the same evening by Dr. Simon Flexner, director of the Rockefeller Institute for Medical Research, on the "War activities of the Rockefeller Institute." A distinguished audience, including the Governor General and the Lieutenant Governor, attended this most interesting and able lecture.
